WING TRAINING COURSES AT DCAE COSFORD

1. It had become necessary to change the transportation arrangements for cadets travelling to DCAE Cosford for the JNCO Leadership and Drill Courses.
2. Up until now it has been practice for the various SOV drivers to collect cadets from their individual Squadron Headquarters. This has often resulted in late arrival at Cosford due to the number of locations to be called at across the Wing, an early start for cadets straight after leaving school and an unnecessarily long drive covering many miles and hours for the drivers after a full working day which in itself carries health and safety issues.
3. It was therefore agreed at a recent Wing Training Meeting that centralised collection points would be used in the same way as other major Wing events. These will become effective from the next JNCO course 16-18 Feb 07.
4. The pickup points are attached and whilst it is accepted this will be a little more inconvenient for individual units it will assist the smooth and effective running of the courses. OCs are asked to ensure their cadets are at the collection points by the times stated on the nomination letters. It is hoped that unit staff or parents can assist with the dropping of and collection of cdt's.
5. Your anticipated cooperation is appreciated and any queries direct to the undersigned please.
